SPADOC/DMSF MOA

1. PURPOSE: Obtain ADCOM/J3 approval on a Memorandum of Agreement (MOA) among ADCOM, SAC and AWS for SPADOC/Defense Meteorological Satellite Program (DMSF) Operational Relationships.

2. DISCUSSION: A revised version of the SPADOC/DMSF MOA has been approved by SAC and AWS (MOA at Atch 1) and submitted for ADCOM approval. ADCOM had approved a version in May 1980. The earlier version is at Atch 2, and differences with the current draft are annotated. Approval at that time was at the ADCOM/J3F level. Since then, the command has standardized that J3 will be the ADCOM approving official for all SPADOC MOA.

3. The major difference in the versions is that DMSF reporting will now be through the SAC Command Post, vice the 4000 Satellite Operations Group (the DMSF operator, also at Offutt AFB). This draft has been sent to AFSCF/CC for recoordination (Atch 3).

4. SUMMARY. There were few substantial changes made in the MOA during the year-long coordination at HQ SAC. The current MOA is consistent with other SPADOC MOA in all key respects, and will allow DMSF to be fully integrated into the SPADOC system.

RECOMMENDATION:

5. J3 approve the MOA by signing attachment 1 at the Tab.

ORIGINAL SIGNED  
WILLIAM T. DICKMAN, Colonel, USAF  
Director, Defense Programs  
and Operations

3 Atch  
1. SPADOC/DMSF MOA  
2. MOA, May 80  
3. J5C Ltr to AFSCF/LG

(No record of attachments  
1 and 3.)
